LangiaFlow Personal Data Processing Consent

Revision of 09 November 2026 · Separate voluntary consent for enquiries

I am an adult visitor making an enquiry for myself or, where relevant, acting as a parent or legal representative for a child. I voluntarily consent to the processing of my information by Maksim Sergeevich Agafonov (Агафонов Максим Сергеевич), an individual applying Russia's NPD tax regime (taxpayer ID / INN 667805799009), to respond to my enquiry. Contact: maxim700a@gmail.com. The previously disclosed mailing address is 3A Krasnaya Sosna Street, Moscow, Russian Federation.

1. Purpose

To consider my enquiry about remote Slovak, German, English or other language lessons, contact me and discuss available consultation or trial-lesson arrangements.

2. Information covered

My name, phone/email/Telegram contact, requested language, learning goal, date and time of the enquiry, technical request information, and the fact, time and version of this consent. The public form does not request a child's personal data.

3. Processing and technical delivery

Collection, recording, organisation, storage, use, correction, restriction, deletion and destruction for the stated purpose. When the live integration is enabled, submissions may be delivered to the operator via Cloudflare Worker and Telegram Bot API. The controller must first fulfil any applicable localisation, notification and international-transfer obligations.

4. Duration and withdrawal

Consent continues until the purpose is achieved or until withdrawn. Enquiries not leading to a paid service should be deleted no later than 90 calendar days after the last interaction unless the law requires otherwise. I may withdraw by emailing maxim700a@gmail.com, subject to any legal ground allowing continued processing.

5. How I consent

I provide this consent by checking a separate checkbox that is initially unchecked and then submitting my enquiry. It does not permit marketing messages, public sharing of contact details or optional analytics cookies.

The personal data processing policy is published separately and can be reviewed before submitting the form.
